From a logistics standpoint, we would need to have our refrigerated company vehicle (sprinter van) within our designated area to ensure easy access to the fresh product. Our coolers can only hold a certain amount of juice at a time so this would ensure we would get all attendees juice as quick as possible!

The van also requires access to power so I will note that as well. Since it is an indoor event, we would just need access to a regular outlet so that we aren't using diesel inside the event space.

Van Dimensions:
19.5 ft L x 7 ft W x 8.5 ft H
(with Thermo King referer unit)

LOADING RAMP
18'W X 8'7"H
